SMART CONTROL

4 touch-sensitive keys allow volume control and selection of Wi-Fi/Bluetooth modes and auxiliary input. A multifunction LED lets you know the state of your speaker in each mode.

The IR remote control greatly increases the ease of use by allowing you to act directly and quickly without having to open the application on the phone.

Thanks to a fiber cone subwoofer and 3 channels of amplification, Arpeggio provides a rich and balanced sound curve, surprising for its size. Complete and uncompromising, Arpeggio brings power and fidelity with a compactness that allows it to find a place everywhere.
